A **full-service** logistics solution to deliver the results you need.

We support customers in every way possible and are particularly experienced in fulfilment. From your Factory door to end customer B2C one solution via our dedicated Fulfilment centre.

Fulfilment Logistics Services Ltd are an established division of the IFE Global Group and are responsible for our extensive logistics fleet and customs bonded warehouse. We guarantee an excellent service, already enjoyed by a vast number of UK Importers and Chinese suppliers.

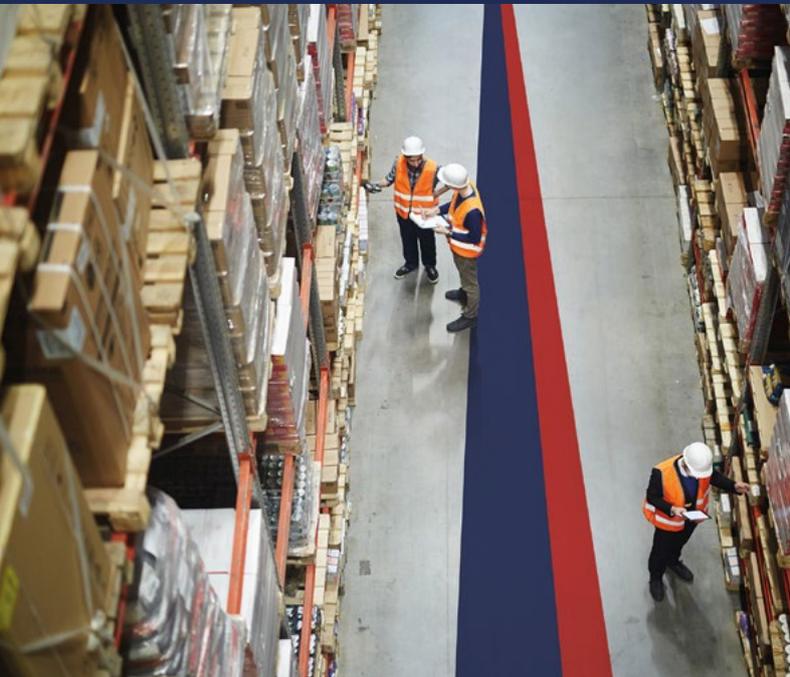

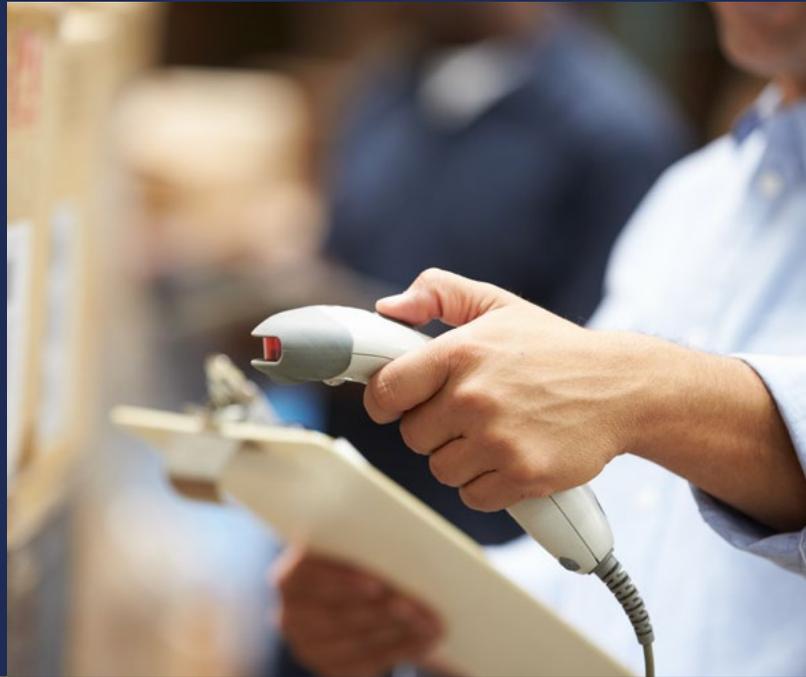

With Fulfilment Logistics Services you can expect:

- Secure warehousing and e-commerce management
- An experienced team, that includes Chinese speaking staff and certified UK accountants
- Access to the SMART Portal, which enables you to access real time information to improve productivity, keep track of consignments and reduce costs.

CORRECT DOCUMENTATION

We'll ensure all the correct paperwork and documentation is managed and in good order. This will allow you to be confident and ensure smooth processing and tracking of your goods.

FBA AND E-COMMERCE

We guarantee a hassle free, end to end service from warehousing and inventory to shipment and tracking.

TAX AND VAT SUPPORT

Our in-house team, Fulfilment Tax Services Ltd, are on hand to guide you through all your VAT and duty responsibilities.

Gain full control of your logistics with the **UK's first real-time logistics portal** that tracks to container level

IFE Global Logistics have launched 'YOUR SMART PORTAL' which ensures you can remove complexity and reduce costs for all of your consignments. This powerful digital toolkit provides unrivalled visibility and control through its extensive self-service functionality. You will also have access to a dedicated support team, day or night.

What key areas does the portal cover?

The IFE Global Logistics Smart Portal features 31 separate functions that drives down your costs and administration pressures by digitising all your critical logistics functions. **Including:** -

- Real time tracking to container level
- Delivery timelines
- Real-time collaboration
- Delivery scheduler
- Purchase order management
- Accurate forecasts of ETA
- Powerful reporting
- More visibility
- Greater control
- Real time data
- Reduced costs
- Easy to use functionality
- Personalised dashboard
- Reliable, expert support

Real-time tracking

Our smart logistics portal delivers real-time visual tracking at carton and container level. Position data from a vessel's AIS transponder is downloaded to our smart portal from satellites in low-orbit. This is matched with ship or plane manifests so you can track individual containers or cartons on the vessel actually carrying your cargo – not the vessel that the operator says it was originally booked on. This real-time tracking of vessels and individual cartons is a first for a UK forwarder, and extends our ability to track cartons once unloaded from ship or plane.

Real-time collaboration

The smart portal automatically notifies you when there is a shipment update or clearance documentation is required. This reduces delays in taking action and keeping everyone informed. Controlled access can be granted to your logistics partners ensuring that everyone can act on real time information.

Accurate forecasts of ETA

Accurate and independent forecasts of ETA are automatically sent to our smart logistics portal, which if different from the current ETA generate automatic alerts. The data provide much more accuracy than that provided by the shipping line.

Delivery timeline

Intuitive graphical displays for each consignment are generated for each segment of a journey by road, rail and ocean, giving greater visibility on goods in transit.

Delivery scheduler

Once a consignment has arrived and cleared customs, the smart logistics portal immediately notifies you to arrange delivery to its final destination.

Dashboard

A dashboard summarises your notifications and alerts. This allows you to take timely actions and minimises any supply chain disruptions.

Purchase order management

Our smart portal combines supply chain data and provides visibility of all purchase orders and the ability to create and manage shipments.

Powerful reporting

A comprehensive range of search and reporting options can help identify improvements, as well as benchmark the performance of logistics partners.

“Real time tracking gives early visibility of progress and delayed deliveries to help you plan and manage your consignment. The portals online collaboration tools, automatic updates and powerful, up to the minute reporting ensures you will retain full control and visibility meaning you can improve productivity and drive down costs where possible. You will also drive down administration & processing time and reduce inaccuracies. Achieved by creating, storing and sharing appropriate paperwork which is linked to your consignment’s activity.”

Can I set up a free trial?

Yes – we can allow you access to the portal so you can try it out for yourself. You’ll be assigned a dedicated team member to help walk you through the platform and answer any questions you may have.

Digital Logistics customers benefit from our global support.

Our extensive global network is built on the years of established experience and talent within our business. If you choose us to manage your logistics projects, you will have direct access to a much wider team who will help guide, advise and support your organisations logistical needs.
